PROFILE

Product designer and systems thinker who turns ambiguous customer problems into calm, useful software. Seven years shaping B2B workflows across research, interaction design, and design operations.

EXPERIENCE

Staff Product Designer Atlas Field Systems	Mar 2023 — Present New York, NY
- Led the redesign of a field-operations platform used by 18,000 technicians; reduced time-to-complete for high-volume workflows by 31%. - Established a decision log and weekly research rhythm across product, design, and engineering; improved experiment turnaround from 21 to 9 days. - Built the first shared component library and accessibility review practice, supporting three product squads and a 94% internal adoption rate.	
Senior Product Designer Quill & Metric	Jul 2020 — Feb 2023 Remote
- Designed onboarding, reporting, and billing experiences for an analytics platform serving 2,400 independent businesses. - Partnered with data science to prototype explainable recommendation patterns; increased activation of the weekly insights feature by 24%. - Mentored four designers and introduced critique formats that made product rationale visible before implementation.	
Product Designer Common Ground Health	Aug 2018 — Jun 2020 Boston, MA
- Reframed a fragmented care-coordination workflow into a single task model, reducing missed handoffs in the pilot program by 18%. - Planned and moderated 35 customer research sessions with care teams, patients, and administrators.	

SELECTED WORK

Independent project , Signal Board (signalboard.design)	2025 — Present
A lightweight decision journal for small product teams. Designed the information model, interaction system, and editorial voice; currently used by 12 distributed teams.	
Maintainer , Inclusive Patterns Kit (patterns.example.com)	2022 — Present
Open-source checklist and component examples for accessible enterprise UI patterns; 1,100+ monthly readers.
